Proud Canadian Brand

KEPLER

Upgrade to Comfort, Efficiency, and Savings

A new Kepler gas furnace isn't just about heating, it's about smart energy use, lower utility bills, and long-term peace of mind. With advanced engineering and high AFUE (Annual Fuel Utilization Efficiency) ratings, our furnaces maximize the heat from every drop of fuel, helping you cut down on waste and costs year after year.

Built for performance. Designed for savings. Tested for your peace of mind.

Save More Every Day

Our variable speed blower motors operate efficiently all year, whether circulating warm air in winter or cool air in summer. Compared to traditional fixed-speed motors, this technology delivers noticeable savings on your electricity bills while maintaining consistent comfort.

Why Replace Your Old Furnace?

- **Rising Energy Bills** – Older furnaces lose efficiency over time, costing you more each month.
- **Age** – With a typical lifespan of 10–12 years, it's often more cost-effective to invest in a new model than to continue repairing an aging one.
- **Modern Technology** – Today's furnaces offer better control, quieter operation, and higher efficiency than ever before.
- **High Repair Costs** – If repair expenses are more than half the price of a new furnace, upgrading is the smarter choice.

KEPLER

Quietly Smart
Perfect Comfort

97% AFUE

97G2VK

KEY FEATURES

- VERIABLE SPEED MOTOR
- TWO-STAGE GAS VALVE
- ENERGY STAR® QUALIFIED
- COMFORT & QUIET PERFORMANCE
- REFREGERANT DETECTION*
